nivra

Quiet attention. Clear action.

Human-supervised safety intelligence for schools.
A precise identity, built around the people who decide.

Ink Navy
#172C40

Attentive Teal
#167D8D

Warm White
#F5F4EF

Watch carefully. Act thoughtfully.

Nivra helps school safety teams review visible activity and coordinate a human response. The identity should feel modern, composed and clear.

PRECISE

Explain what was observed.
Use plain, specific language.
“Movement near the east gate.”

HUMAN

Keep the operator in control.
Describe choices, not verdicts.
“Review before dispatch.”

CALM

Normal operation stays quiet.
Make attention purposeful.
“All cameras connected.”

Avoid

Fear-based slogans, “crime prediction”, facial-identification claims, or guaranteed protection.
“Quiet attention. Clear action.” is proposed brand copy, not a performance claim.

One word. A clear signal.

nivra

nivra

Custom outlined lowercase lettering; no font is required to use the logo.
The square i-dot is the signal. Open counters keep the wordmark approachable.
The compact n is for app icons and already-labelled product contexts.

Clear space: at least one i-stem width on every side.
Minimum wordmark width: 120 px digitally / 30 mm in print.
Minimum icon size: 24 px. Below that, use a text label.
Never stretch, rotate, outline, add shadows, or recolour individual letters.

Colour with a job to do.

INK NAVY
#172C40

Responsibility and composure.

ATTENTIVE TEAL
#167D8D

Purposeful focus and action.

WARM WHITE
#F5F4EF

Clarity and breathing room.

Use warm white for most surfaces, navy for text and identity, and teal sparingly.
Suggested balance: 70% warm white / 25% navy / 5% teal.
Use navy or deep teal #126F7D text on warm white; use pure white text on teal.
Do not place navy text on teal. Colour must never be the only status cue.

Amber #A65B00 = review needed. Red #B63D3D = urgent attention. Green #23734D = resolved.
These are functional states, not extra brand accents. Pair each with words and an icon.

Strong type. Generous space.

Bahnschrift

HEADLINES / SIGNAGE / SHORT LABELS

Use sentence case for messages.

Keep headlines brief and direct.

Use 1.4-1.6 line height for body text.

Align content to a simple left edge.

Give the logo room; avoid crowded panels.

Segoe UI

BODY COPY / INTERFACES / LONGER READING

Spacing rhythm: 8 / 16 / 24 / 40 / 64. Prefer open layouts and flat colour.

Photography: real school spaces, natural light, respectful distance.

Avoid targeting reticles, face boxes, weapons, neon cyber effects and stock shields.

Fonts are available in this Windows environment and are not redistributed in this kit.

For web or third-party delivery, confirm font licensing or commission a licensed substitution.

Ready for school environments.
