HEADINGS 600 / BODY 400 / LABELS 700

Body: 16 px / 1.5. Captions: 12 px minimum. Headings: 24, 36 and 48 px. Sentence case for instructions.

TEXT PAIRINGS

Readable text 14.16:1

Readable text 14.16:1

Readable text 7.96:1

Ratios use the exact sRGB tokens. Light text on the accent is excluded for small copy.

Meaning and visual system

Three complementary parts make one shared opening: observations, human judgement and response.

The brand idea

The mark derives its character from the space between its parts. Rounded geometry and a lowercase wordmark make the system approachable while the dark neutral keeps it grounded. The parts also create a useful pattern for covers and event material.

Composition

Pair fresh apricot with graphite-brown, balanced by alabaster. Keep layouts contemporary with open sans typography; avoid sepia filters and heritage styling.

Photography

Shared campus and venue settings, approachable distance and ordinary people. Fresh daylight; warm materials without a nostalgic filter.

Graphic language

Repeat the three-part module in controlled crops. Keep the original spacing within each complete mark. Use a single crop on covers; dense patterns belong on secondary surfaces.

App icon

Graphite-brown tile with an apricot symbol. Use one-color mark for small, low-detail contexts.

Refinement before production

The three-part symbol offers the richest pattern language. Its silhouette needs distinctiveness screening because clustered marks can suggest recycling or unrelated community brands.

Use the identity responsibly

One name, five surfaces

NIVRA Command / Camera / Respond / Admin / Trust. Keep one shared symbol; use product names as readable descriptors.

Logo rules

Allow 0.25 x symbol width as provisional clear space. Use supplied proportions, single-color and reverse treatments. No stretching, rotation, added shadows or casual redrawing. Exact minimum sizes follow vector tests.

Operational wording

Operator: Human review required. Responder: Response requested. Action: Acknowledge. Field state: On scene. Resolution: Situation clear.

Tone

Plain, specific and calm. Describe observations and human decisions. Avoid crime prediction, inferred intent and guaranteed prevention claims.

What is delivered

Full-color board, this guide, editable written specification, CSS and JSON color/type tokens. The guide uses the actual licensed typeface; generated board lettering is illustrative.

What follows selection

Refined master vectors, outlined logo typography, transparent PNG and icon export pack, small-size proofs and print validation. These are not included as finished assets yet.

Application boundary

Phones, notices and staff materials are generated concept applications. They are not live screens, deployed signage or compliance evidence. An actual site notice needs operator and policy details.

Evidence

Competitor review: Oddity, BriefCam / Milestone, Isarsoft and Omnilert, inspected 17 September 2026. See COMPETITOR-RESEARCH.md. Font source: Google Fonts, SIL Open Font License 1.1.
